

Twitch Player integration

1. Add SDK script tag to the page

```
<script src="https://nobuffer.net/sdk/kilosdk.js"></script>
```

2. Add placeholder div for embedding Twitch Player

3. Add Twitch Player API script tag to the page

```
<script src="https://player.twitch.tv/js/embed/v1.js"></script>
```

4. Create Twitch Player object.

```
new Twitch.Player(<placeholder div id (from step 2)>, {  
  width: <player width>,  
  height: <player height>,  
  video: <video ID from Twitch>  
});
```

5. Initialise SDK

```
kilosdk.init({  
  videoId: <unique video ID>,  
  player: {  
    type: 'TwitchPlayer',  
    instance: <Twitch Player instance>,  
  },  
  modules: [ {type: 'Reward', }]  
});
```
